EDUCATION

Guru Gobind Singh Indraprastha University

2021-2025

Bachelor of Technology in Computer Science

CGPA : 8.47

Modern Vidya Niketan School, Aravali Hills

2021

Class 12th, CBSE

Percentage : 87

WORK EXPERIENCE

Frontend Developer Intern

July 2024 – Oct 2024

GrapplTech

- Spearheaded the design and development of responsive web pages utilizing Html, Css, JavaScript, and ReactJs, ensuring seamless cross-browser compatibility and optimal performance across diverse platforms and devices.
- Collaborated with cross-functional teams, including designers and back-end developers, to deliver high-quality, scalable solutions that align with business goals and client requirements.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML/CSS

Frameworks: ReactJs, Node.js, ExpressJs, MongoDB, Material-UI, Scss, Tailwind, Bootstrap, RestAPI

Databases: SQL, MongoDB

Developer Tools: Git, Github, Postman, Jira, Figma

PROJECTS

Quill | *Javascript, ReactJS, NodeJS, ExpressJs, MongoDB, Sass*

- * Quill is an advanced blog-sharing platform designed to facilitate seamless content creation, sharing, and discovery. Users can draft, publish, or schedule their stories for future release, offering flexibility in content management.
- * The platform ensures robust security with email OTP verification during the sign-up process, safeguarding user accounts. Additionally, users can bookmark stories for future reading and append personal notes for enhanced engagement.
- * Quill fosters a community-driven experience by allowing users to follow their preferred authors, interact with content through various reactions, and stay up-to-date with the latest publications from creators of interest.

FlexFlix | *Javascript, ReactJS, Firebase, Html5, Git, Redux, Css*

- * Developed FlexFlix, an OTT streaming platform that allows users to explore a wide variety of movies and web series, built using JavaScript and ReactJS for a dynamic, responsive user interface.
- * Designed a Netflix-inspired platform with custom design elements, including features such as Sign-In, Sign-Up, and Browse Pages, offering an intuitive and engaging user experience.
- * Integrated Firebase Services for secure user authentication and leveraged Cloud Firestore to efficiently sync and store video content, ensuring smooth performance and scalability.

Rentz.com | *ReactJs, Redux, Css(Sass), NodeJs, Express, MongoDB*

- * Developed Rentz.com, a property rental platform that allows users to search for properties in their desired location, offering a seamless browsing experience.
- * Implemented Login/Sign-Up with avatar selection, location-based property listings, and advanced filtering options (size, budget) to optimize the property search process. Built a Cart feature enabling users to add, remove, and clear properties, along with a payment section to display the final cart value, ensuring a smooth transaction flow.

ACHIEVEMENTS

- Won 2nd place in an intra-college coding competition, demonstrated strong problem-solving and coding skills in a time-constrained environment.
- Contributed to an Open-Source project Uppy by enhancing existing functionality resulting in optimized performance.
